

VASANTH RAJ R

AWS & DevOps Engineer

Location: Chennai, Tamil Nadu | **Mail id:** newhorizon1796@gmail.com | **Mobile:** +91-7305965413 |

LinkedIn Id: <https://www.linkedin.com/in/vasanth-raj-r-164b8a410>

SUMMARY

AWS & DevOps Engineer with **7+ years of IT experience**, including **5+ years in DevOps and cloud engineering**. Experienced in designing scalable AWS infrastructure, building CI/CD pipelines, and managing containerized workloads on Kubernetes (EKS). Strong focus on automation, system reliability, cost optimization, and production-grade deployments.

SKILLS

Cloud Platforms: AWS (EC2, Auto Scaling, ALB/ELB, S3, VPC, Route53, IAM, RDS, DynamoDB, EBS, Redshift, EKS)

DevOps & CI/CD: Jenkins, GitHub Actions, AWS CodePipeline, Maven

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible

Containers & Orchestration: Docker, Kubernetes, Helm, Amazon EKS

Monitoring & Logging: Prometheus, Grafana, SonarQube

Version Control: Git, GitHub

Scripting & OS: Bash, Python, Red Hat Linux

EXPERIENCE

DevOps Engineer

September 2024 – Present

Knitech Soft Solutions, Chennai

Architected AWS infrastructure and CI/CD pipelines for microservices, improving deployment reliability and system availability.

Provisioned infrastructure using Terraform (VPC, EC2, ALB, Auto Scaling, EKS), reducing environment setup time.

Built and deployed containerized applications using Docker and Kubernetes (EKS), enabling zero-downtime releases via rolling and blue-green strategies.

Implemented Prometheus & Grafana monitoring, improving incident detection and reducing response time.

Optimized cloud costs through autoscaling and resource tuning; enforced IAM least-privilege and secure networking practices.

DevOps Engineer

April 2022 – August 2024

Merit Nano Digital Solutions, Chennai.

Designed and maintained CI/CD pipelines using Jenkins, GitHub, Maven, and AWS CodePipeline, reducing deployment errors by 50%

Automated infrastructure provisioning using Terraform and CloudFormation, ensuring consistent multi-environment deployments (Dev, QA, Prod).

Managed Kubernetes workloads on Amazon EKS, including Helm-based deployments and HPA configuration, improving application scalability and resource utilization by 30%.

Integrated SonarQube quality gates into CI pipelines, increasing code quality compliance by 45%.

Implemented centralized monitoring with Prometheus and Grafana, reducing production incident resolution time (MTTR) by 35%.

Automated routine operational tasks using Python and Bash, reducing repetitive manual tasks by 60%.

Associate DevOps Engineer

July 2020 – April 2022

Merit Nano Digital Solutions, Chennai.

Designed and deployed secure AWS infrastructure within custom VPC architecture with public/private subnets and RDS integration.

Built Jenkins pipelines for automated builds and deployments, increasing release frequency from bi-weekly to weekly cycles.

Automated server provisioning and configuration using Ansible playbooks and reusable roles, reducing configuration drift by 40%.

Provisioned and scaled Kubernetes clusters on AWS EKS, optimizing compute utilization and reducing over-provisioning costs.

Implemented disaster recovery strategies ensuring high availability and minimal data loss.

Technical Support Engineer

January 2019 – June 2020

Merit Nano Digital Solutions, Chennai.

Provided L2/L3 technical support for infrastructure and application issues, improving SLA adherence. Troubleshoot Linux server, networking, and deployment-related issues, reducing escalation rate

KEY ACHIEVEMENTS

Accelerated deployments from manual processes to automated CI/CD pipelines.

Improved infrastructure consistency and reliability using Infrastructure as Code.

Strengthened production monitoring and reduced incident response time. Successfully managed containerized workloads in Kubernetes (EKS) environments.

EDUCATION

Bachelor of Technology in Civil Engineering

Periyar Maniammai University • Thanjavur, Tamil Nadu • 2017
