

VASANTH RAJ R

AWS & DevOps Engineer

Location: Chennai, Tamil Nadu | : newhorizon1796@gmail.com |  +91-7305965413 |  [linkedin.com/in/vasanth-raj-r-164b8a410](https://www.linkedin.com/in/vasanth-raj-r-164b8a410)

PROFESSIONAL SUMMARY

AWS & DevOps Engineer with 7+ years of IT experience, including 5+ years in DevOps and cloud engineering. Experienced in designing scalable AWS infrastructure, building CI/CD pipelines, and managing containerized workloads on Kubernetes (EKS). Strong focus on automation, infrastructure as code, system reliability, cost optimization, and production-grade deployments across multi-environment setups.

TECHNICAL SKILLS

Cloud Platforms: AWS — EC2, Auto Scaling, ALB/ELB, S3, VPC, Route53, IAM, RDS, DynamoDB, EBS, EKS, ECS, CloudWatch, CloudFormation, CodePipeline

DevOps & CI/CD: Jenkins, GitHub Actions, AWS CodePipeline, Maven, GitLab, YAML

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible

Containers & Orchestration: Docker, Kubernetes, Helm, Amazon EKS, Amazon ECS, Fargate

Monitoring & Logging: Prometheus, Grafana, AWS CloudWatch, SonarQube

Version Control: Git, GitHub, GitLab, Bitbucket

Scripting & OS: Bash, Python, Linux (Red Hat, Ubuntu, Amazon Linux)

PROFESSIONAL EXPERIENCE

DevOps Engineer

Knitech Soft Solutions, Chennai

Sep 2024 – Present

Architected AWS infrastructure and end-to-end CI/CD pipelines for microservices using Jenkins and GitHub Actions, improving deployment reliability and system availability.

Provisioned infrastructure using Terraform (VPC, EC2, ALB, Auto Scaling, EKS), reducing environment setup time by 40% and eliminating manual provisioning errors.

Built and deployed containerized applications using Docker and Kubernetes (EKS); implemented rolling and blue-green deployment strategies to achieve zero-downtime releases.

Implemented Prometheus & Grafana monitoring dashboards for real-time visibility across services, improving incident detection speed and reducing mean time to respond (MTTR).

Optimized cloud costs through right-sizing, autoscaling policies, and resource tagging; enforced IAM least-privilege and security group rules across all environments.

Automated routine operational tasks using Bash and Python scripts, reducing manual toil and standardizing operational runbooks.

DevOps Engineer

Merit Nano Digital Solutions, Chennai

Apr 2022 – Aug 2024

Designed and maintained CI/CD pipelines using Jenkins, GitHub, Maven, and AWS CodePipeline, reducing deployment errors by 50% and increasing release frequency.

Automated infrastructure provisioning using Terraform and CloudFormation, ensuring consistent multi-environment deployments across Dev, QA, and Production.

Managed Kubernetes workloads on Amazon EKS including Helm-based deployments and Horizontal Pod Autoscaler (HPA) configuration, improving scalability and resource utilization by 30%.

Integrated SonarQube quality gates into CI pipelines as a blocking stage, increasing code quality compliance by 45%.

Implemented, centralized monitoring and alerting using CloudWatch, Prometheus and Grafana, reducing production incident MTTR by 35%.

Automated routine operational tasks using Python and Bash, reducing repetitive manual effort by 60%.

Associate DevOps Engineer

Merit Nano Digital Solutions, Chennai

Jul 2020 – Apr 2022

Designed and deployed secure AWS infrastructure within custom VPC architecture with public/private subnets, NAT Gateway, and RDS integration.

Built Jenkins pipelines for automated build and deployment workflows, increasing release frequency from bi-weekly to weekly cycles.

Automated server provisioning and configuration using Ansible playbooks and reusable roles, reducing configuration drift by 40%.

Provisioned and scaled Kubernetes clusters on Amazon EKS, optimizing compute utilization and reducing over-provisioning costs.

Implemented disaster recovery strategies including automated snapshots and cross-AZ failover, ensuring high availability and minimal data loss.

Technical Support Engineer

Merit Nano Digital Solutions, Chennai

Jan 2019 – Jun 2020

Provided L2/L3 technical support for infrastructure and application issues, maintaining SLA adherence across production systems.

Troubleshoot Linux server, networking, and deployment issues; reduced escalation rate through root cause analysis and documentation of recurring incidents.

EDUCATION

Bachelor of Technology – Civil Engineering,

2013-2017

Periyar Maniammai University, Thanjavur, Tamil Nadu.
